
[FCC Revisions, Commentary & Errata](#)

Revisions

Revisions to *FCC* standards are published in the *FCC*, which includes a main edition and three Supplements. Revisions supersede any previously published content.

[View Rules and Procedures of the Council of Experts](#)

Commentary

Public comments to revision proposals in the *FCC* Forum are reviewed by the Food Ingredients Expert Committee. Following the Rules and Procedures of the 2020–2025 Council of Experts, revision proposals can advance to publication with minor modifications, as needed, without requiring further public review.

Errata

Errata are considered to be text erroneously published in the *FCC* or its Supplements that does not accurately reflect the intended requirements as approved by the Council of Experts. Errata are posted on the last Friday of June and December to align with the posting of the *FCC* Forums, and are effective on the first day of the following month.

- Errata are corrected in each online publication (*FCC* bi-annual edition, first, second, and third Supplements) and include revision symbols to designate changes—?new text? (ERR 1–Jul–2022)

Errata are posted in the interactive table below. Users can search for an item by title, or sort the table by column heading. In addition, data can be downloaded in Excel or CSV format and printed.

- **Errata Effective Date** refers to the date the Erratum becomes effective.
- **Source Publication** is the latest effective publication where the Erratum appears, or upcoming effective publication if the Erratum was introduced after the latest effective publication.
- **Page Number** indicates where the item is found within the source print publication.
- **Target Errata Print Publication** will be populated with NA as of December 31, 2021. This column is no longer relevant as the *FCC* will be online only starting March 1, 2022.
- **Target Online Fix Publication** specifies when the Erratum will be corrected online and may be the main edition or Supplement.
