

# Third Supplement to FCC 10 Online

**Type of Posting:** Publication Correction

**Posting Date:** 23-Mar-2018

USP recently determined that there are items missing from the Table of Contents in the Third Supplement to FCC 10 online. The following six files are impacted:

- A. Chromatography (in Appendix II)
- B. Microbiological Enumeration Tests (in Appendix XII)
- C. Tests for Absence of Specific Microorganisms (in Appendix XII)
- Appendix XIV: Markers for Authenticity Testing
- Appendix XV: Microbial Food Cultures Including Probiotics
- Solutions and Indicators

Although not directly accessible using the Table of Contents navigation feature, the substantive content is present in the online compendial product and can be found using the search tool (see below for instructions).

**Search Instructions:** In the "Search By" box at the top right-hand corner of the page, search for any of the sections listed above. The content will be among the returned search results.

The screenshot shows the USP FCC Online interface. At the top, there is a navigation bar with the USP logo, 'FCC Online', and a search bar containing 'Appendix XIV: Markers for Authenticity Testing'. Below the navigation bar, there is a breadcrumb trail: 'Home > Pubs > FCC 11 > General Tests and Assays > Appendix XIV: Markers for Authenticity Testing > Appendix XIV: Markers for Authenticity Testing'. A yellow banner indicates 'Effective from Jun 01, 2018 (FCC11)'. The main content area displays 'Appendix XIV: Markers for Authenticity Testing' with 'Prev Version' and 'Next Version' buttons. Below the title, it states 'Published in: FCC 11' and 'First Published: FCC 7, Third Supplement'. A note reads: 'Tests contained within this Appendix are not monograph requirements, but rather are provided as informational methods for FCC users.' On the right side, there is a 'Related Information' sidebar with sections for 'Reference Standards' (Not Applicable), 'Auxiliary Information', and 'Topic/Question: APPENDIX XIV - MARKERS FOR AUTHENTICITY TESTING'. The contact information for Kenny Xie, Scientific Liaison, is provided with the phone number (240)221-2052.

We sincerely apologize for any inconvenience this may have caused you.
